

PRODUCT DATA SHEET

Product ID RGL3

Description: Twin Leg Webbing Lanyard & Shock Absorber

Accredited to: EN 354:2010
EN 355:2002

Material: 26mm water repellent polyester

Fittings: RGK1 and any compatible EN 362 connectors

Max arrest force: < 6 kN

Features: Fitted with shock absorber pack

Lengths: 1.3m and 1.8m

A twin leg lanyard with the same specifications as the RGL1 additionally allows movement between anchorage points by means of double clipping.

This system is generally used for tower climbing, steel erecting, scaffolding and maintenance on open structures. When used in conjunction with two girder slings (RGK26), the RGL3 can be used as a means of progression through suitable structures where no fixed lifeline or eyebolts are available. We use 37kN polyester webbing to manufacture this product which helps give the product a longer life. It is also treated with a water repellent coating which also extends the life of this product.
