Industrial Applications

Sensors
The GasAlertMicro 5 is available in three models: toxic/electrochemical, PID (for VOCs) or IR (for CO_2). For more information about available sensor configurations, please contact BW Technologies by Honeywell.

Electrochemical and catalytic bead sensors available for:

H_2S	CO	O_2
SO_2	Cl_2	ClO_2
NH_3	PH_3	HCN
NO_2	O_3	Combustibles (LEL)

Photoionization sensor available for volatile organic compounds (VOCs) detection.

Infrared (IR) gold series sensors available for carbon dioxide (CO_2) detection.

Note: Due to board and sensor configuration GasAlertMicro 5 models are not interchangeable (i.e. a PID sensor cannot be used in a IR configured unit).

Both the diffusion and pumped configurations are compatible with the MicroDock II automated bump test and calibration system
